# LD SAT Study Guide: Test Prep And Strategies For Students With Learning Disabilities

## Synopsis

The first SAT guide for students with learning disabilities. For the growing number of students with learning disabilities who take the SAT each year, studying for the test is even more grueling than it is for traditional students. There is nothing on the market to prepare them for the SAT, and traditional manuals are inadequate both in content and presentation. LD SAT Study Guide is the first commercially available SAT preparation manual that prepares students with disabilities in general, and devotes specific attention and instruction to the more common disabilities, including dyslexia, ADD/ADHD, nonverbal learning disabilities, math disabilities, and visual or auditory processing disorders. As a free supplement to the book, readers will have access to a companion website that enables them to take several practice tests and receive subject-specific feedback that pinpoints their strengths and weaknesses. Students can then focus their preparation accordingly to maximize their overall SAT score.

## Customer Reviews

With the number of kids diagnosed with learning disabilities steadily increasing, the need for a book like this has never been greater. I am surprised more educators had not demanded that a book like this be written 10 years ago. Fortunately, Paul Osborne has stepped in with a combination of real life experience (he too is a dyslexic test-taker) and great methods that he has developed over the course of a 10 year + career as an educator. The book contains great advice and easy to follow steps to help kids with a variety of learning differences tackle the SAT and excel. An excellent

resource.

This book is easy to read with some good common sense ideas. That said, if you don't qualify for extra time, you won't have time to do the things suggested in the book. If you do qualify, this is a good investment.

Finally! It's great that Paul has given kids with learning disabilities a prep book to give them guidance...thank you Paul!

I was really impressed by this SAT prep book for many reasons. I liked that the author gave advice specific to each learning disability. There is also useful advice about managing extended time. The what you think bubbles are extremely helpful. Be sure to check out the outline content too!

My son recently finished his tutoring sessions with Paul Osborne. During their sessions and for homework assignments Mr. Osborne's book was used and my son's SAT scores increased in all three areas! A wonderful book and a wonderful mentor!!
