Minnesota Birds: A Folding Pocket Guide To Familiar Species (Pocket Naturalist Guide Series)

Synopsis

The North Star State is the permanent or migratory home of 438 species of birds, including the state bird – the common loon. This beautifully illustrated guide highlights over 140 familiar and unique species and includes an ecoregion map featuring prominent bird-viewing areas. Laminated for durability, this lightweight, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Made in the USA.

Customer Reviews

Heavy, vinyl folder-style identification for all the Minnesota birds. It takes up little space in home or for travel or on a bird expedition in Minnesota. It wipes clean with a damp cloth so will keep forever without frayed edges or getting tore.

My daughters and I love identifying the birds who visit our feeder. We mark the ones we see with a dry erase marker. This is much more practical for our use than one of those big bird books. We have found every bird at our feeder so far on this awesome laminated pamphlet.

We travel with 2 young (2 yr & 6yr) children and this guide is fabulous to carry and let the kids use to point out what they see. Very light for the kids to carry & laminated so survives the stomp in every puddle that accompanies our every hike...We have a number of them, CA, PA, MN etc. We get one

wherever we are traveling to a new state. It's also jurable enough to help make longer car trips more interesting.

On a recent trip to Boundary Waters, every bird I looked up was in this guide!
