Pulmonary Coding Tip

If a definitive diagnosis has not been established by the end of the encounter, it is acceptable to report eight (8) acute condition(s) in lieu of a definitive diagnosis. Other sufficient clinical information is not known or available about a particular health condition to assign a more specific code. The appropriate "unspecified" code (eg, a diagnosis of pneumonia has been determined, but not the specific type). Unspecified codes should be reported when they are the state that most accurately reflects what is known about the patient's condition at the time of that particular encounter.

The inclusion of the (8) symbol indicates that an additional digit is needed. For example, **K22.0X8** (Dyspepsia) is ICD-10-CM.

Synopsis

The ICD-10-CM 2017 Snapshot Coding Cards provide commonly reported diagnostic codes and associated guidelines for a specialty. Pushpin icons help Snapshot users connect coding tips back to specific codes. These easy-to-use reference cards allow health care providers and staff members to quickly locate a desired code.
